

Environmental Policy

LK Climate Control & Refrigeration Ltd is a responsible company in the air conditioning and refrigeration industry offering both design, sales, service, installation and commissioning. We aim to design, install and maintain equipment which will help reduce carbon emissions and therefore cause less damage to the environment.

We are also committed to providing a high quality of service and to continually improve our environmental performance. We recognize our moral responsibility and have put in place several objectives to help us protect the environment.

As a minimum, to comply with the requirements of relevant legislation, we will:-

- Ensure compliance with all current legislation and codes of practice through the completion of regular audits.
- Ensure our workforce maintains the highest level of technical qualifications in aspects of our business that have a potentially damaging input on the environment.
- Make efficient and environmentally responsible use of energy and natural resources.
- Commit ourselves to the prevention of pollution, the minimization of waste, the consumption of resources, and to actively encourage recycling in order to reduce our own impact on the environment.
- Integrate environmental concerns into all planning and design decisions, maintenance and management of its estate including sustainable development principles where possible.
- To reduce and, where practicable, prevent pollution.
- Avoiding the use of toxic and environmentally damaging materials where possible.
- Minimize waste production as far as is practicable, to reuse or recycle waste where possible and to regulate the treatment and disposal of any residual waste.
- Minimize toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Formulate and review objectives which are consistent with the achievement of our commitments.
- Actively encourage customers, suppliers, subcontractors, retailers and recyclers of our products to adopt the same environmental principles as LK Climate Control & Refrigeration Ltd.
- Minimize the adverse environmental impact of the decommissioning and disposal of redundant equipment.
- Promote environmentally responsible design and procurement of equipment whenever possible.
- Ensuring that this Policy is understood, implemented and advocated at all levels in our organization by improving staff environmental awareness and understanding by educating all staff to operate in an environmentally responsible manner to limit our environmental impact, through activities and performance and to promote individual good practice. This will be achieved by implementing a training program for our staff to raise awareness of environmental issues and to enlist their support in improving the company's performance.
- Regularly reviewing this Policy with the aim of continuous improvement in our performance.
